### PROJECT SITE: KEPİRTEPE (KIRKLARELİ)

In this project, the aim is to develop a Science, Art and Design Village on the site of the old Village Institute in Kepirtepe/Kırlareli by reusing the existing buildings with new buildings/additions and organizations, designed in a holistic framework. This site and project will provide, all through the year, open, semi- open and closed spaces, and services to different students and young artist groups for education and production. For this, in the Science, Art and Design Village, alongside scientific research stations, production and performance areas, accommodation and service spaces are also needed. Because of the historical and cultural importance of the site and the buildings, a museum or an exhibition area (memory space) reflecting the history in question must be included in the project.
